

Here is the way I was able to create PDF files of the Roll20 character sheets.

The first thing I did was open the character sheet and pop it out into it's own browser window using the button at the top left of the sheet.

The image shows a Roll20 character sheet for a Dwarf Fighter named Awu Glaavop. A red box highlights a button in the top left corner, which is used to open the character sheet in a separate browser window. The sheet is titled "Awu Glaavop" and includes a "Show to Players" button and an "Edit" button. The character's class is "Fighter 1" and their background is "Acolyte". They are a "Dwarf" race with a "Lawful Good" alignment. The sheet is divided into several sections: "Bio & Info", "Character Sheet", "Attributes & Abilities", "Macro Generator", "Export & Overwrite", and "Token Editor". The "Character Sheet" section is currently active, showing the character's stats, abilities, and equipment. The stats section includes Strength (2), Dexterity (3), Constitution (5), and Intelligence (1). The abilities section includes Proficiency Bonus (2) and Saving Throws (Strength, Constitution, Wisdom, Charisma). The equipment section shows a total of 1 hit dice (D10) and 1 hit point maximum. The sheet also includes sections for "Personalities Traits", "Ideals", "Bonds", and "Background".

DEATH SAVED

I see omens in every event and action. The gods try to speak to us, we just need to listen.

I idolize a particular hero of my faith, and constantly refer to that person's deeds and example.

Tradition. The ancient traditions of worship and sacrifice must be preserved and upheld. (Lawful)

I owe my life to the priest who took me in when my parents died.

I put too much trust in those who wield

I then right-clicked the bar at the top of the new browser window.

The screenshot shows a web browser window titled "Awu Glaavop - Google Chrome" with the address bar showing "app.roll20.net/editor/popout". A red arrow points to the address bar. The page has a navigation bar with tabs: "Bio & Info", "Character Sheet", "Attributes & Abilities", "Macro Generator", "Export & Overwrite", and "Token Editor". The "Character Sheet" tab is active.

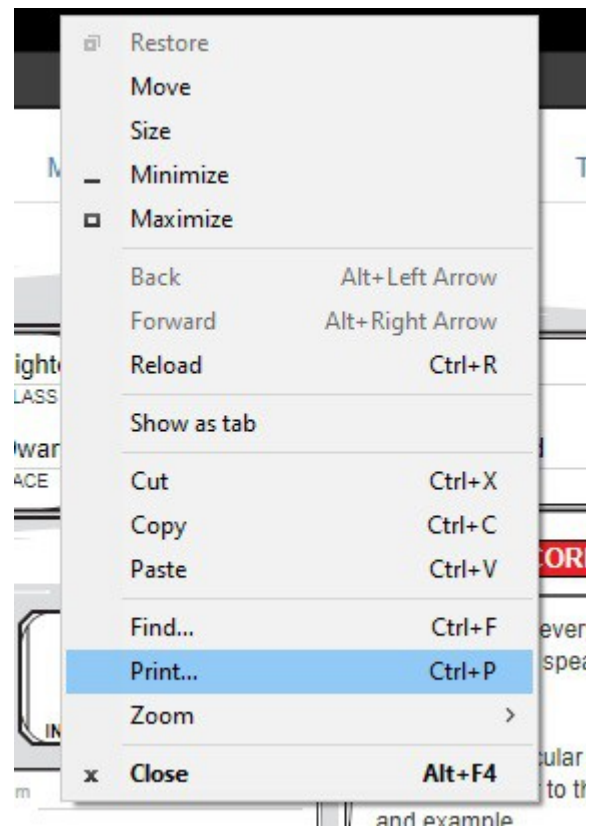

The character sheet is for a character named "Awu Glaavop". The header section includes the "DUNGEONS & DRAGONS" logo and the character's name. Below the name, there are fields for "CLASS & LEVEL" (Fighter 1), "BACKGROUND" (Acolyte), "RACE" (Dwarf), "ALIGNMENT" (Lawful Good), and "EXPERIENCE POINTS".

The main section of the character sheet is divided into several panels:

- Left Panel:** Contains ability scores (Strength 15, Dexterity 16, Constitution 20, Intelligence 12, Wisdom 11) and saving throws (Strength 4, Dexterity 3, Constitution 7, Intelligence 1, Wisdom 0, Charisma -1).
- Top Right Panel:** Contains "INSPIRATION" (2) and "PROFICIENCY BONUS" (2).
- Center Panel:** Contains "ARMOR CLASS" (16), "INITIATIVE" (3), "SPEED" (25), "Hit Point Maximum" (15), "CURRENT HIT POINTS" (15), and "TEMPORARY HIT POINTS".
- Bottom Left Panel:** Contains a list of skills (Acrobatics, Animal Handling, Arcana, Athletics, Deception, History, Insight, Intimidation) with checkboxes for proficiency.
- Bottom Center Panel:** Contains "Total" (1), "HIT DICE (D10)" (1), "SUCCESSSES" (000), "FAILURES" (000), and "DEATH SAVES".
- Bottom Right Panel:** Contains a table of weapons (Greataxe, Handaxe) with their attack bonuses and damage types.
- Right Panel:** Contains sections for "PERSONALITY TRAITS", "IDEALS", "BONDS", and "FLAWS".

The "CORE" tab is selected, and the "SPELLS" tab is also visible. The "Edit" button is located in the top right corner.

This opens a menu, with a print option.

Here are the print settings I used to print the 5th Ed Roll20 Sheet. It does okay but does not include the background image. You will want to print as PDF with these settings.

The image shows a screenshot of the Roll20 character sheet editor for a character named 'Awu Glaavop'. The character is a Dwarf, Lawful Good, with a level of 1. The sheet is filled with various statistics, skills, and equipment. Overlaid on the right side of the character sheet is a 'Print' settings panel. The panel shows the following settings:

- Destination:** Save as PDF
- Pages:** All
- Layout:** Portrait
- More settings:**
 - Paper size:** A4
 - Pages per sheet:** 1
 - Margins:** Default
 - Scale:** Custom (75)
- Options:** Headers and footers (checked)

At the bottom of the print panel are 'Save' and 'Cancel' buttons. The character sheet itself includes sections for 'PROFICIENCY BONUS', 'SKILLS', 'EQUIPMENT', and 'FEATURES & TRAITS'.

If you want to print multiple tabs on the sheet repeat these steps until you get a PDF of each tab. You can then merge each tab as a page into a master PDF using this free site.

<https://www.youpdf.com/merge-pdfs.html?cpid=765cd3a4-0422-47db-bb20-8a1cdb0d16ab#>

This is a drag-n-drop operation, simply drag the files into the window in the order you want them in the final PDF.

MERGE NOW

Convert files to DOC and PDF with FromDocToPDF™ by MyWay™
(includes convenient web search with a Chrome browser new tab extension).

When you hit the Merge Button it will pop up the download option box.

DO NOT click on the big blue CONTINUE button, this is a app install button and has nothing to do with your file.

You want to click the “Download your merged file here” link to save your finished PDF file to your system.

I hope this helps you.
